# ALLOCATIONS

For students newly enrolled in Master of Science programs, the allocation in the Sections and the optional courses is based on a **merit ranking** considering the **score** assigned by the Academic Commissions in the admission.

The allocation procedure in the **2<sup>nd</sup> year** for the optional courses, is based again on a **merit ranking** considering the **student's academic average** passed on 31<sup>st</sup> July of each year.

**The preferences** expressed will be accepted considering the student's **ranking** until the maximum number of places available for each course is reached, the first options will be evaluated first.

## COURSES IN EXCESS

These courses **don't count as curricular activity to achieve the MSc Degree** and are not considered in the academic average.

**However, they are considered in the calculation of the credits on which the tuition fees are calculated.**

Acceptance in the excess courses depends on the availability of places registered after the study plan registration.

# INTERNAL DOUBLE DEGREE | SPECIAL PROGRAMS

**The area of action:** the design and management of innovative business models and organizations for product-service systems.
