BUSINESS INNOVATION

The course aims at providing the models and methods for managing innovation. The course focuses first on Innovation (and specifically technological innovation) as a source of competitive advantage, therefore aims at providing capabilities for developing innovation strategies. Next, it focuses on product and service innovation and illustrates models and methods for managing the product-service development process. The methodology is based on lecturing, teamwork and case studies.

- Part 1 – Innovation Strategy and Innovation Process:

Innovation and competitive advantage; approaches to innovation: technology push, market pull (user centered design), design push (design-driven innovation) innovating business models, design-driven process and the Interpreters, organizing the new service-product development process.

- Part 2 – New Service Concept Development:

Concept Statement; R&D, Ideas and New Concepts; Lead User Analysis.

- Part 3 – Project Work:

Designing New Meanings of Services.
